

Nature's Classroom Institute offers a completely customization and tailor made schedule for each visiting school.

Most of our schools follow a similar time line however the activities chosen depend entirely on what the school would like to achieve on their trip.

For some of our sites it is possible to include excursions, swimming and other activities. Arrival and Departure sites can be moved to fit with each schools travel plans.

The attached schedules are designed to give visiting schools and their teachers the ability to use a foundation when building their trip with their states Outreach Director and Education Director
