

Dietary Requirement Policy

Nature's Classroom Institute MUST be made aware of all dietary requirements for each student two weeks before the student arrives for their adventure with us. This will ensure arrangements are made, if we do not know of a student's dietary requirement within two weeks of arrival we may not be able to accommodate.

Each of the facilities we lease to run our programs offer a varied, but familiar, dining experience. At Nature's Classroom Institute we try extremely hard to accommodate all dietary requirements as we aim to be as inclusive as possible.

Please note that each site may be capable of accommodating more than is listed below. If you or a student have a specific need please speak directly to the Outreach Director or Education Director who is organizing your trip.

At all facilities we can accommodate:

- Vegetarian
- Dairy Free
- Soy Free
- Shellfish
- Peanut and Tree Nut
- Gluten Free
- *Vegan* Not all of our sites can accommodate a fully vegan diet.

It is entirely possible that the facility your student is attending can accommodate far more than what is listed above. Please be sure to speak to us directly if you have any concerns.

At Nature's Classroom Institute we do allow students to bring their own food and snacks if agreed upon to help that student supplement the food available in the dining hall. This is not facilitated by us but by the teachers from the school. Some of our sites will not allow outside food into the dining space.

ALL SITES ARE PEANUT AWARE FACILITIES
